PROFESSIONAL SUMMARY

AI-focused full-stack developer building scalable, production-ready applications integrating LLMs and real-time systems. Experienced in designing end-to-end architectures using React, Node.js, and MongoDB with AI-driven features. Strong in algorithmic problem solving (100+ DSA problems) and building immersive, user-centric platforms combining software engineering with generative AI.

EDUCATION

Bachelor of Technology (Artificial intelligence) 2024 - 2028
Newton School Of Technology, Rishihood University, Grade: 7.2/10.0

Intermediate (Class XII) 2023 - 2024
St Joseph's College , Nainital Grade: 75.0%

Matriculation (Class X) 2021 - 2022
St Joseph's College , Nainital Grade: 89.0%

PROJECTS

Gamified Interview App ([Github](#)) ([Demo](#)) December 2025

- Built a gamified AI-based interview preparation platform to solve the problem of **boring and static interview practice systems**, enabling users to engage in dynamic, role-based technical challenges with real-time feedback.
- Developed using React, Node.js, Express, MongoDB, and Groq (Llama 3.3), implementing LLM-based question generation and evaluation pipelines, reducing redundant API processing and improving system efficiency by 35%.
- Delivered an immersive RPG-style learning experience with adaptive difficulty, real-time performance tracking, and leaderboard systems, significantly improving user engagement and consistency in interview preparation.

Library Management System ([Github](#)) ([Demo](#)) November 2025

- Designed a full-stack library system to solve inefficiencies in manual book tracking processes, enabling digital borrowing workflows, role-based access control, and real-time availability management for both users and administrators.
- Built using React, Node.js, Express, MongoDB, and JWT authentication, implementing optimized database queries and automated fine calculation mechanisms, improving backend efficiency and reducing manual errors by approximately 30%.
- Enabled seamless book borrowing, tracking, and analytics through interactive dashboards and structured workflows, improving overall user experience while reducing administrative workload and ensuring secure, scalable system operations.

CERTIFICATIONS

JavaScript Master Course From Beginner to Expert Developer Learnify IT ([Link](#)) January 2026

Completed a project-based JavaScript course covering ES6+, DOM manipulation, asynchronous programming, and full-stack development using Node.js and Express. Built dynamic web applications and REST APIs.

Skills:

JavaScript, Node.js, Express, HTML, CSS, Git

SKILLS

Computer Language: CSS, HTML, Java, JavaScript, Python, TypeScript

Courses: Data Structure

Databases & Data Tools: Excel, MongoDB, MySQL

AI / ML: GenAI, LLM

APIs & Testing: API, Postman

Cloud & DevOps: Git and Github

Frameworks & Libraries: Express JS, Node.js, NumPy, Pandas, Prisma ORM, React, Tailwind CSS

EXTRA-CURRICULAR ACTIVITIES

- **Painting:** State 2nd place winner; multiple zonal-level achievements
- **Music:** Guitarist (electric & acoustic) and vocalist; zonal-level performances in band competitions
